Patient and visitor information

About us

Our Urgent Care Centre is staffed by skilled registered nurses. We are able to treat patients for many medical conditions.

What happens when I arrive at the Urgent Care Centre?

Please use the bell at the front window to let us know that you are there. A nurse will talk to you and/or your family to assess (or triage) your medical needs. If you start to feel worse in any way while you are waiting please let us know straight away.

How long will I have to wait?

We see patients in order of need - emergencies will always be seen first. If you have a less urgent need there could be a long waiting time to be seen and we might not know how long the wait will be. Even at times when the waiting room seems quiet, staff may be very busy. Thank you for your patience and understanding.

Are visitors allowed?

Two visitors can come into the Urgent Care Centre with a patient. There are no set visiting hours in the Urgent Care Centre. We ask that visitors use their mobile phones in the waiting room area. There is a toilet for visitors to use near the waiting area.

Will I see a doctor?

Doctors (GPs) in the Urgent Care Centre are from local Benalla medical clinics. After we assess you, the nurse will decide whether to call a doctor in to see you. This will depend on how urgent your condition is.

If we need to call a doctor to see you we will contact the "on-call doctor" rather than your own GP.

For non-life threatening emergencies, you may be asked to make an appointment with your doctor at their clinic. After hours, we may use our Telehealth system.

What is Telehealth?

Telehealth is a video system where you can talk to and see a doctor. There is no cost to use telehealth. Depending on your needs, our nurse may set up a telehealth consultation with one of the emergency department doctors at Northeast Health Wangaratta.

Are there costs?

Doctors who work in the Urgent Care Centre are from private medical clinics. Usually, there will be a cost to see the doctor in the Urgent Care Centre. The private medical clinic will send you a bill for these costs, not Benalla Health.

Nurses in the Urgent Care Centre will not be able to tell you the cost to see a doctor. If you have any questions about costs, please talk with the doctor when they see you.

I have a pre-existing medical condition. How can I help the staff at the Urgent Care Centre be prepared for this?

If you have a condition that needs special care or treatment when you come in, please contact us before you might need our services. The more we know about what care you need and what your wishes are, the better prepared we will be to meet your needs.

Please note: Routine (repeat) dressings are not done by nursing staff at the Urgent Care Centre unless your doctor's clinic or district nurse has organised this for you. If you need to have ongoing dressings (such as for a chronic or a surgical wound) this will need to be done by your local medical centre or a district nurse.

What to bring

- ✓ Medicare card
- ✓ Your current medications
- ✓ Ambulance membership
